

Compost for Pumpkins

When I arrived to school in the morning, I saw Cathy and Melody working with the children to transfer compost from our worm bin to the Green Room garden box. We transferred some of the pumpkins from their pots to the garden box, and we will be stewards of the pumpkins as they grow!

Abby hands legend a worm she found. Kobe enjoys digging.

Otis and Legend work to dig and put the worm compost into a bucket.

Zippy is smiling because Townes runs between the new pumpkin garden box and her ~ giving hugs each time.
