

# Glitter Ice

September 13th, 2016

**Tashi, C.c.**, and **Deniz** look closely at the glittery ice.

The children worked hard trying different methods to get ice out of the pot.

**C.c.** uses a chopstick to pry the ice out of the muffin tin.

**Landyn** and **Aleita** love working both together and independently.

The children are big fans of ice, especially in this heat! Since Summer is coming to an end, we decided to do different kinds of water play most days this week. Today, a mixture of glitter and ice, with some different tools were presented.
