

## Robert's 3rd Birthday: A Boat/Water Celebration

24 October 2017

The children made Robert his very own boat out of a plastic water bottle, mini popsicle sticks, a wooden heart button, a chopstick, and tape for the flags.

When he opened his gift, he gave a little smile and was so careful with his boat. It even floats! For his special celebration, the sensory table was filled with water, glitter, tiny puff balls, and small cups & spoons. The children made potions. Soon, sea creatures found their way into the sensory bin to play in the water. On another table, some children explored frozen hand shapes made from filling rubber gloves with water and freezing them. The children were very interested in removing the gloves with scissors, feeling the coldness, and then eating the ice! The day was fun for all. Happy 3rd Birthday, Robert!
