

September 28, 2011 Today some of the children worked in the studio with lentils in the sensory table. LG said “we have these at my house, but not these colors”. Louise put the lentils in a clear plastic box with a lid, creating a shaker for “making music”. Quincy sorted as she chose only the colored beads to put in the container. LG found a piece of ribbon and worked to make a ‘kite’, flying it through the studio. She added lentils to the cardboard and worked to keep the kite balanced, adjusting the placement of the ribbon and the container as needed. Louise watched LG, chose a container and made a kite for her to fly!
