

Lola & Colin investigate the mechanics & functions of tongs.

"It's so cold! – Wren

Kahlan & Hank become experts with the tongs.

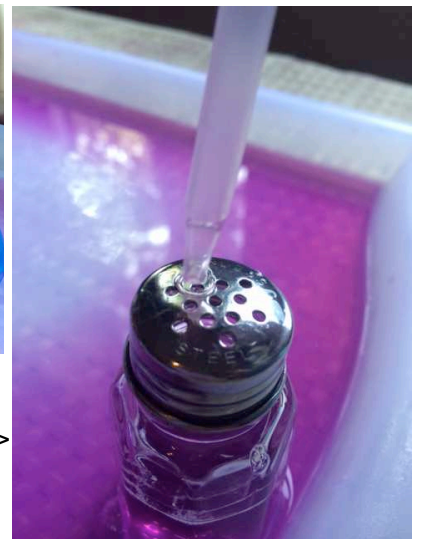

Eden, Colin, & Lila work to access the ice still stuck in the tray.

< ^ Violet drops a partly melted cube into a jar with a narrow neck. "It's too far up there!" [to get with the tongs] she remarked.

^ Colin tries to draw liquid into the dropper from ice.
> Kahlan drops liquid directly through the shaker's holes.

**Colored Ice Provocation with Tongs, Shakers, Droppers
July 28th, 2015**

For our last day of the school year we created a provocation with a crowd favorite: ice! To provoke their play, we offered tongs, salt/pepper shakers filled with water, droppers (a relatively new & difficult tool), & jars filled with water. When the ice melted about halfway, Kalei decided to add salt to stall the melting process & encourage a new play perspective.
